CONSENT FORM FOR ePRESCRIBE PROGRAM

ePrescribing is defined as a physician's ability to electronically send an accurate, error free and understandable prescription directly to a pharmacy from the point of care. ePrescribing greatly reduces medication errors, and enhances convenience for the patient while maximizing patient safety. The ePrescribe Program includes:

- **Formulary and benefit transactions** - Gives the health care provider information about which drugs are covered by your drug benefit plan.

- **Fill status notification** - Allows the health care provider to receive an electronic notice from the pharmacy telling them if your prescription has been picked up, not picked up, or partially filled.

- **Medication history transactions** - Provides the health care provider with information about your current and past prescriptions. This allows health care providers to be better informed about potential medication issues and to use that information to improve safety and quality. Medication history data can indicate: compliance with prescribed regimens; therapeutic interventions; drug-drug and drug-allergy interactions; adverse drug reactions; and duplicative therapy.

By signing this consent form you are agreeing that Delaware Valley ID Associates may request and use your prescription medication history from other healthcare providers and/or third party pharmacy benefit payers for treatment purposes.

Understanding all of the above, I hereby provide informed consent to Delaware Valley ID Associates to enroll me in the ePrescribe Program.
